DETAILED ACTION

1> This action is in response to Applicant's amendment. Claims 1, 3, 4, 6-9, 11-13 and 15-21 are amended. Claims 22 and 23 are added. Claims 1-23 are presented for further examination.

2> This is a non-final rejection.

Allowable Subject Matter

3> Claims 1-15 and 22-23 are allowed.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4> Claims 16-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. A computer readable medium having instructions thereon which when executed perform the steps as claimed in claims 16-21 would normally be considered statutory unless the specification defines "computer readable medium" as including intangible media such as signals, carrier waves, transmissions, optical waves, transmission media or other media incapable of being touched or perceived absent the tangible medium through which they are conveyed.

In other words, claims 16-21 are not limited to tangible embodiments. In view of

Art Unit: 2152

Applicant's disclosure, specification page 17, paragraph 1, the medium is not limited to tangible embodiments, instead being defined as including both tangible embodiments (e.g., computer systems) and intangible embodiments (e.g., transmission media, transmission wave media). As such, the claim is not limited to statutory subject matter and is therefore non-statutory.

Possible amendments to overcome this rejection include amending the specification to eliminate references to intangible embodiments or specifically limiting the claims to tangible embodiments.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
